

Quality Policy

Latitude 50 Ltd believes that the success of software development and services depends upon the management of quality throughout the life cycle of each project, so that a smooth transition between different stages can be achieved. Benefits include:

- Increased visibility and control of the software development process.
- A documented specification agreed with the customer to ensure that bespoke product is consistent with expectations.
- Pre-defined milestones as checkpoints for progress.
- Rigorous testing of software for robustness, specified functionality and ease of use.
- Professional installation by a qualified engineer, where required.

To meet the specified requirement of the Customer, the Company applies a quality management system in conjunction with other management controls. The Quality Manual and Procedures Manual describe the system.

Responsibility for upholding this policy is truly Company-wide under the guidance and with the assistance of Top Management who encourage the personal commitment of all staff to address quality as part of their skills.

It is the Company's policy to seek to operate to these standards continuously and to implement and operate fully the ISO 9001-2000 standards through registration and annual review.
